

# Black Hole Pipeseam (broken) instructions

**step 1**

glue

X-Acto knife

rubber cutting mat

parts (printed on 200 gsm paper)

**Black Hole pipeseam (broken)**  
In the 2003 Game Boy Advance turnbased strategy game Advance Wars 1, no unit can cross a pipeseam, not even planes or Captains.  
Only if you can destroy one of the pipes seams, your units will be able to pass through to the other side. If your opponent is stronger than you though, it might not be such a good idea to break the pipeseam just yet...

**All you really need to build your own broken Pipeseam, are the parts, a sharp knife, a cutting mat and glue.**

**step 2**

part 1

part 2

**Pre-shape and glue together part 1. Then cut out and fold part 2 like a harmonica, following the fold lines.**

**step 3**

**Take your time to glue part 2 to the "jagged" end of part 1 as shown here.**

**step 4**

part 3

**Glue the bottom of part 3 to the open back of part 1, and then fold it over to close it.**

**step 5**

parts 1-3

parts 4-6

**Black Hole Pipeseam (broken)**

**Do the same for parts 4-6 to make the other half of the broken pipeseam.**

**Thank you for building a Ninjatoes' papercraft model!**
